| AquaAce – Double Side | http://fyi.toshiba.com | NA | Special1 | 8.5x11, 11x17, 11x47 | 2 |

- The gloss media described in this guide has only been tested in limited quantities and under moderate environmental conditions. Acceptable performance was observed during these limited tests. Performance may vary under heavier volume usage.
- Image quality on this gloss media may differ from that of the color copier 28 lb. bond recommended for the device.
- Coated and glossy media in general, are not specifically designed for use in electrophotographic devices; therefore performance of this media may be highly variable.
- Use of this gloss media may result in shorter consumable life and require more frequent maintenance of the copier.
- Toshiba America Business Solutions is not responsible for damage caused by misuse of the tested media
